OVERVIEW

Jogger is a Web3 sports social platform with built-in Game-Fi and Social-Fi elements !

Running is a practice! Dr. Ulrich Batemann, a professor of behavioral psychology at the University of Würzburg in Germany, found that those who can regularly and moderately jog exercise are more stable in mood, have stronger communication skills with others, and are less prone to bruises. Autistic tendencies.

In order to allow more people to enjoy a relaxed and pleasant way of exercising and get rid of the sub-health state, the Jogger platform is now combining blockchain technology to launch a sports social platform that makes money while running. Create economic income! Users equip themselves with NFTs in the form of sneakers . Build a long-term and stable network platform through various sports such as walking, jogging or speed running outdoors, and its network social function, and guide the personalized content generated by users. The game tokens obtained by users through sports can be used in sports games and shopping malls , and can also be cashed out for profit.

With Game-Fi, Jogger aims to push users around the world to live a healthier lifestyle, combat climate change and connect the public to Web 3.0, while relying on its social networking capabilities to build an enduring platform that fosters user-generated Web 3.0 content .

Note: Jogger is currently in public beta, so the content in the white paper may change in the future.

Definition

Game token: JOG

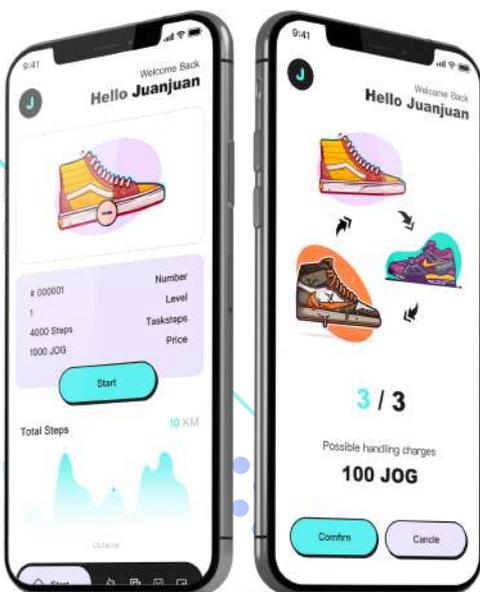

Fuel token: KTO

GETTING STARTED

First, users need to download the Jogger app

1. **Download the Jogger app** from Appstore or Google Playstore download.
2. **Registering for Jogger:** After accessing the application on your respective device, you will be able to register for **Jogger using your email address** . You will receive a verification code which you will need to enter to enter the application.
3. **Create a new wallet:** Click on the wallet icon in the upper right corner of the screen. The app will generate a 12-word passphrase. This will be used to restore your Wallet if you uninstall the app or forget your passcode.
IMPORTANT - Write down this phrase and keep it in a safe place (Write it down and store it somewhere only you can access it.)
4. **Transfer JOG to your in-app wallet:** Transfer JOG to your in-app wallet to buy NFT running shoes on the market and always keep some KTO in your wallet account for fuel.
5. **Buy running shoes:** Go to the mall to pick out sneakers! You can use the filter tool to find the type of running shoes you like. Make sure you have enough JOG to buy.

Congratulations! Everything is ready.

After purchasing the sneakers, you need exercise value energy every 24 hours (fixed at 00:00 Singapore time).
You can start your Jogger journey immediately after the first purchase!

We strongly recommend that you back up your wallet private key / account password to prevent your account from being leaked .

GAME-FI ELEMENTS

1.1 Sport mode

Jogging

Under running sports, users are equipped with NFT running shoes and earn Jog tokens through mobile. Jog obtains the required energy movement value. Every 24 hours, the accumulative amount of exercise can reach 2000-3000 steps, and the number of kilometers should not be less than 1000-2000 meters. Exercise only starts after the user gets the NFT sneaker. First, the user selects their favorite sneakers and presses start. Always make sure your boost value is 100% before exercising, because if your boost value is not 100%, it will affect the amount of JOG tokens earned.

Sneaker Type

The basic GST return is different for each sneaker type. See the Sneaker Attributes section for individual classifications for each sneaker type.

Gas Fee

The gas fee keeps at 100%, the more JOG you get every day. There are 11 cycle levels for gas fee, and different cycle levels consume different fuel KTO tokens. Without gas fee will reduce JOG production by 70-90% for period level.

Sports attributes of Sneaker

The more steps you exercise, the more JOG you earn every day. Users can only earn JOG from level 0 to level 6. Depending on the level of the user, the number of exercise steps is different every day, and the amount of JOG earned is also different.

Sports boost value

In order to maximize the commission income, users should form their own teams. The more new users are recruited, the more JOG tokens will be obtained as team commissions. The tax rate will be higher if no new users are attracted, and the more new users are attracted, the lower the tax rate will be. The highest tax rate is 30%, and the minimum tax rate is 6%.

1.2 Properties of Sneakers

0 # NFT Sneakers

Free trial version, each user will get a free trial version of sneakers, the initial price is 30 US dollars, the number of distribution is not limited, and the validity period of sports running is 30 days.

1 # NFT Sneakers

Users need to purchase through JOG tokens, the initial price is 20 US dollars per piece, the number of issuance is 100,000, and the validity period of the campaign is permanent.

2 # NFT Sneakers

Users need to purchase through JOG tokens, the initial price is 100 US dollars per piece, the number of issuance is 50,000, and the validity period of the campaign is permanent.

3 # NFT Sneakers

Users need to purchase through JOG tokens, the initial price is 500 US dollars per piece, the number of issuance is 25,000, and the validity period of the campaign is permanent.

4 # NFT Sneakers

Users need to purchase through JOG tokens, the initial price is 2,500 US dollars per piece, the number of issuance is 12,000, and the validity period of the campaign is permanent.

5 # NFT Sneakers

Users need to purchase through JOG tokens, the initial price is 12,500 US dollars per piece, the number of issuance is 6,000, and the validity period of the campaign is permanent.

6 # NFT Sneakers

Users need to purchase through JOG tokens, the initial price is 100,000 US dollars per piece, the number of issuance is 3,000, and the validity period of the campaign is permanent.

1.3 Exercise value of Sneakers

0 # NFT Sneakers- Exercise value 1%.

Users need to keep running for more than 3,000 steps and 1,500 meters in 24 hours a day in order to get JOG tokens. If the coefficient does not reach the standard within the specified time, they will not be able to obtain JOG tokens.

1 # NFT Sneakers- Exercise value 1.05%.

Users need to keep running for more than 2,000 steps and 1,000 meters in 24 hours a day in order to obtain JOG tokens. If the coefficient does not reach the standard within the specified time, they will not be able to obtain JOG tokens.

2 # NFT Sneakers- Exercise value 1.1%.

Users need to keep running for more than 2,100 steps and 1100 meters in 24 hours a day in order to obtain JOG tokens. If the coefficient does not reach the standard within the specified time, they will not be able to obtain JOG tokens.

3 # NFT Sneakers- Exercise value 1.15%.

Users need to keep running for more than 2,200 steps and 1,200 meters in 24 hours a day in order to obtain JOG tokens. If the coefficient does not reach the standard within the specified time, they will not be able to obtain JOG tokens.

4 # NFT Sneakers- Exercise value 1.2%.

Users need to keep running for more than 2,300 steps and 1,300 meters in 24 hours a day in order to obtain JOG tokens. If the coefficient does not reach the standard within the specified time, they will not be able to obtain JOG tokens.

5 # NFT Sneakers- Exercise value 1.25%.

Users need to keep running for more than 2,400 steps and 1,400 meters in 24 hours a day in order to obtain JOG tokens. If the coefficient does not reach the standard within the specified time, they will not be able to obtain JOG tokens.

6 # NFT Sneakers- Exercise value 1.3%.

Users need to run more than 2,500 steps and 1,500 meters in 24 hours a day in order to obtain JOG tokens. If the coefficient does not reach the standard within the specified time, they will not be able to obtain JOG tokens.

1.4 Gas Fee of Sneakers

The gas fee divided into 11 tiers

Every 30 days as 1 cycle

No Gas Fees required for the 1st cycle

Starting from 2nd cycle, 5 points will be required as gas fees

Starting from 3rd cycle, 10 points will be required as gas fees

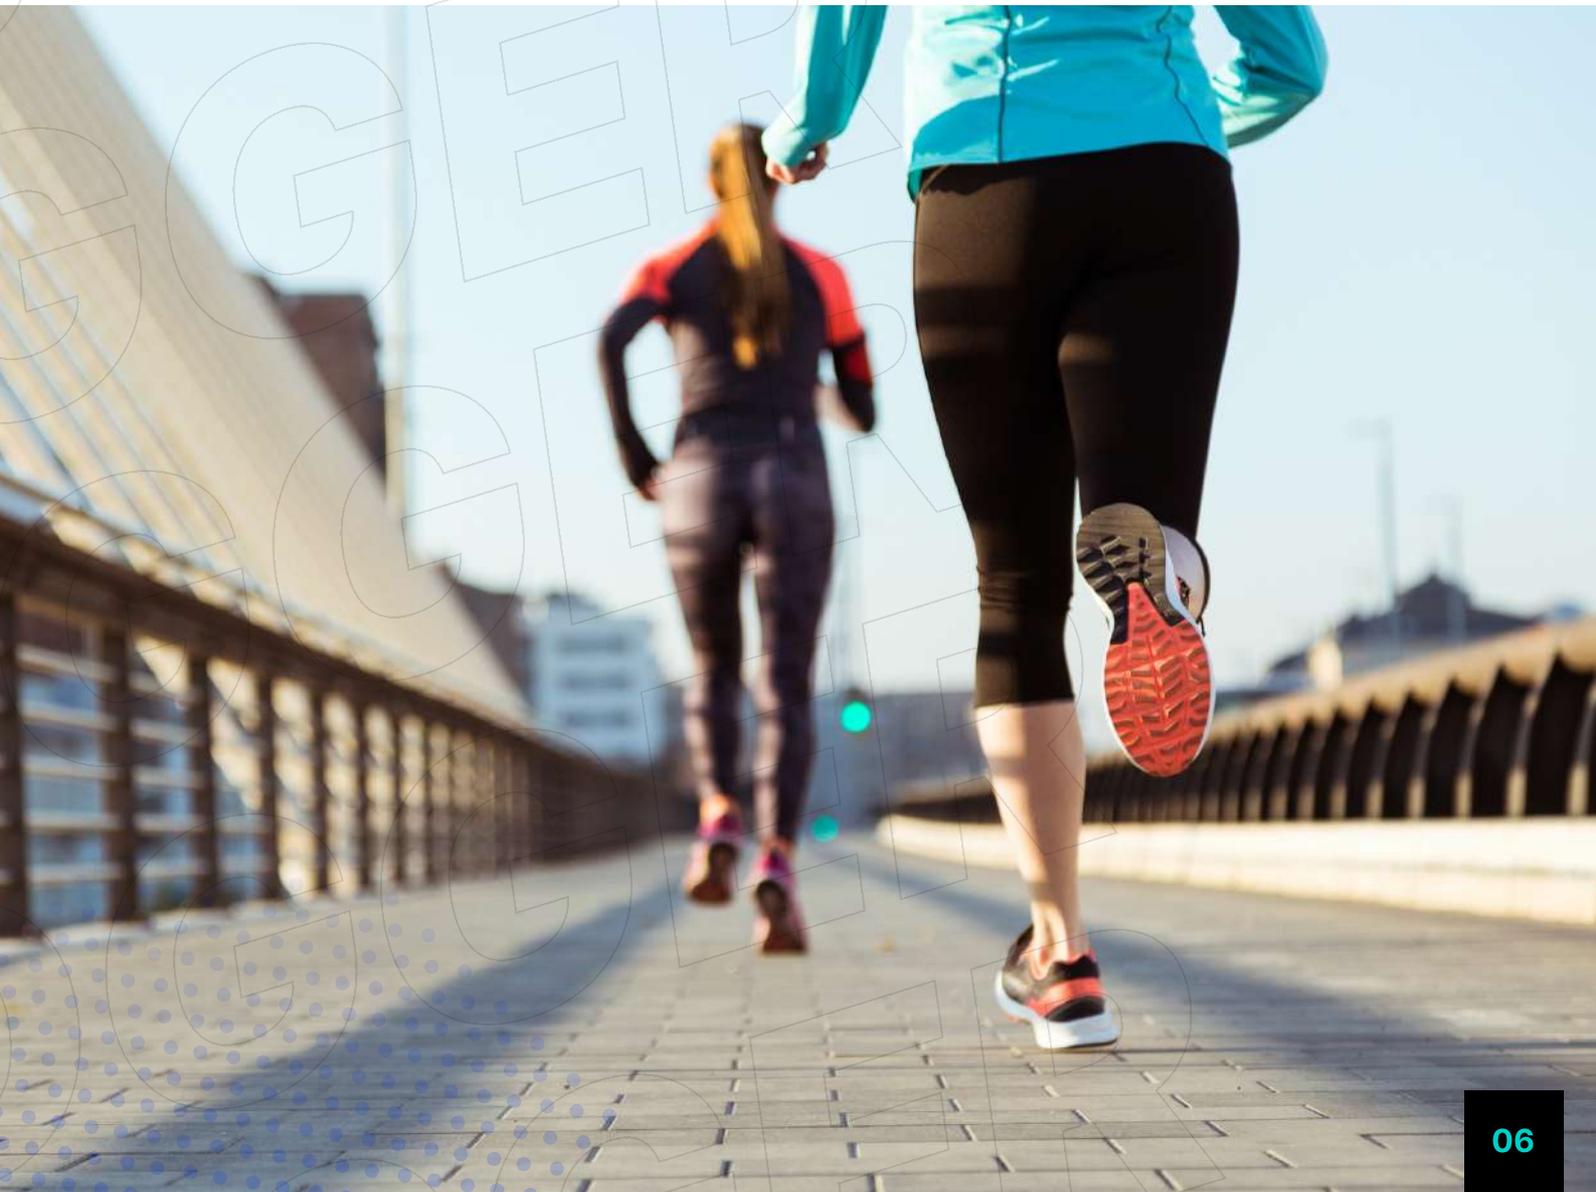

There will be no more increments of gas fees when reached 50 points.

Gas Mechanism

No gas in the first cycle will reduce the output of exercise value by 70%;

No gas in the second cycle will reduce the output of exercise value by 80%;

No gas in the third cycle will reduce the output of exercise value by 90%.

1.5 Foundry shoe industry

Sneakers

Jogger users use the 3 same-level sneakers they own as " synthetics " for upgrades, and in the process generate new higher-level sneakers. For reference, the 3 Only sneakers need to be purchased by the user (not leased) and have Jog gas in order to be crafted for casting.

The user can then choose a sneaker by going to the mall to buy a sneaker, compose to select the sneaker of the same level as it, and press compose to continue. Users will receive the new premium sneakers immediately.

Each sneaker user can have multiple sneakers , the more sneakers there are, the greater the chance of synthesis. Each synthetic shoe cost is calculated separately and added together as the final synthetic cost.

Casting cost

Shoe making cost =

$$1 \# (A) + 1 \# (B) + 1 \# (C) ([A+B +C]*x 5\%)$$

1. if 1# = > \$20, x 3 = 15 %;
2. if 2# = > \$100, x 3 = 15 %;
3. If 3# = > \$500, x 3 = 15 %;
4. If 4# = > \$2500, x 3 = 15 %;
5. If 1# = >\$12,500 , x 3 = 15 %;
6. If 1# = >\$100,000 , x 3 = 15 %;

Note: The cost of making shoes is calculated based on the purchase price of the sports shoes.

Front 1#, 2#, 3# Sports shoes are open for sale first , of which 50% are official sales and 50% are synthetic castings . The earlier you buy , the greater the chance of synthesis .

1.6 Sneakers Quantity

Note : 1#, 2#, 3#, 4#, 5#, and 6# grade sneakers are all sold in limited quantities, and new sneakers can only be cast by synthesis and destruction.

Trial version 0#	Permanent Edition 1#	Permanent Edition 2#	Permanent Edition 3#	Permanent Edition 4#	Permanent Edition 5#	Permanent Edition 6#

GAME-FI SYSTEM

2.1 Achievement System

In Development

In-game achievements are associated with each user's account. It's not on the blockchain, but the badges users earn by completing achievements are NFTs that can be traded:

- Grinding
- Challenge
- Collect
- Battle
- PvP
- Social
- Economy
- Carbon offset
- Interesting
- Map
- Feat of strength
- Meta achievement

2.2 Anti-cheating system

Anti-cheat system

Using jail break, rooted or changed OS devices will cause Jogger not to work properly. We will not help you recover assets lost through the use of GPS spoofing or hacking software. There are three mechanisms used in the game to stop cheating, which include penalties on the cheater's account:

- Desensitized GPS data
- Motion Sensors and Health Data
- Machine Learning Jogger's Anti-Cheat System (SMAC)

After the user long presses the stop button and ends the session, the SMAC system will take the time to analyze whether the user has utilized the Jogger move and earn mechanism.

The user starts with a 100/100 Turing Score (TS), which is invisible to the user. When the user's Turing score is below 100, the user will not be able to interact with the NFT market, nor can they transfer money between consumer accounts and wallet accounts. If the user moves outside without cheating, the Turing score will gradually return to 100/100. After the analysis is completed, the SMAC system will add or subtract the user's Turing score and benefits.

The table below outlines how the system works, and you accept the Turing scores and symbolic consequences that apply to these situations. The table below does not limit our rights to take other actions with respect to your misuse of the App or the Services.

Example*	System Result	Result**
Reverse Engineering	Cheating	Don't earn, Reduce TS
GPS spoofing/hacking	Cheating	Don't earn, Reduce TS
Motion Simulation/Hacking	Cheating	Don't earn, Reduce TS
With multiple phones with Jogger active at the same time	Cheating	Don't earn, Reduce TS
Make animals carry phones that activate Jogger	Cheating	Don't earn, Reduce TS
Run with a group of friends with Jogger activated	Not cheat	Earn, Increase TS
Jogger activated	Not cheat	Earn, Increase TS

*** Moonwalking is not part of the system review because Moonwalking's feedback is instant while the system only displays results after each session.**

2.3 Income cap /mechanism

Sports Mode Earning Cap

The sports mode has both a daily exercise limit and an exercise value limit . These limits limit the amount of campaigns and tokens a user can have per day.

Daily Exercise Limit

The game with 0/0 movement. The maximum energy cap is 200 0/ 300 0. Users can obtain daily tokens through the amount of exercise corresponding to the sneakers (refer to the exercise value system above)

Daily Token Cap

The user starts the daily running game with the corresponding sneakers . There is a daily token supply cap of up to 0.02 % of the total balance . Users can increase their daily JOG cap by upgrading their sneakers. Users can further increase the upper limit of exercise value to 100 % / 100 % by burning some KTO . This option will only be visible when you have reached 100% of your current daily activity value .

JOG has no income cap.

2.4 Assist system

Boost Value

Divided into 16 levels , the higher the level, the more JOG you can get , and the daily limit is as high as 32%/ JOG daily output.

Assistance for recruiting new users

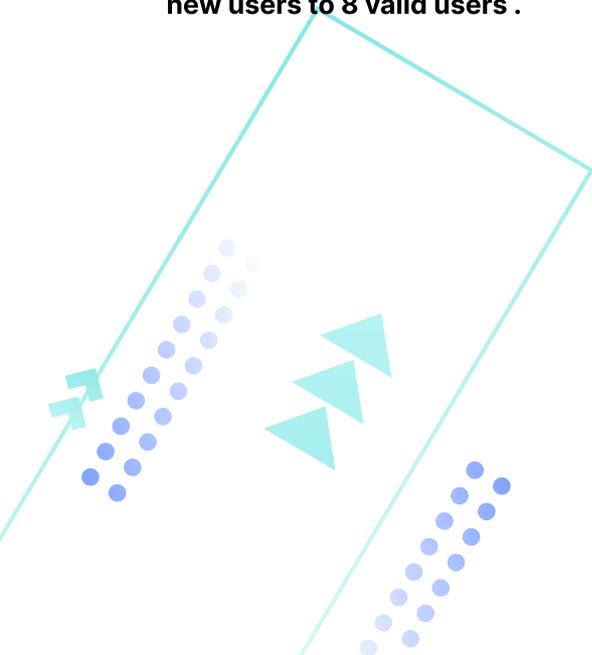

- The boost value for recruiting of 1 new user is 2;
- The boost value for recruiting of 2 new users is 4 ;
- The boost value for recruiting of 3 new users is 6;
- The boost value for recruiting of 4 new users is 8;
- The boost value for recruiting of 5 new users is 10;
- The boost value for recruiting of 6 new users is 12 ;
- The boost value for recruiting of 7 new users is 14;
- The boost value for recruiting of 8 new users is 16.

Withdrawal of taxes and fees

- 30% of taxes and fees for boost value 0;
- 27% of taxes and fees for boost value 2;
- 24% of taxes and fees for boost value 4;
- 21% of taxes and fees for boost value 6;
- 18% of taxes and fees for boost value 8;

- Boost value 12 tax 12%;
- Boost value 14 tax 9%;
- Boost value 16 tax 6%.

Note : Each user is best to attract new users to 8 valid users .

2.5 Tax system

The game will charge different taxes for various in-app activities as follows:

In-app activity	Tax(%)
User sells sneakers	30%
Platform for selling sneakers	70% destroyed
Synthetic cast sneakers	5%/ piece
Withdraw tax	30-6%

***Royalties should be paid to NFT creators.**

SOCIAL NETWORK SYSTEM

Custom sneakers (Under Development)

At level 6 , users can choose to burn JOG / KTO /NFT to customize their sneakers, including but not limited to - renaming, adding quotes, adding extra attribute points, etc. More details on customization will be released soon.

The Social-Fi system will be made public after we finish all the Game-Fi systems. (under development)

OTHER SYSTEMS

4.1 Invitation system

Jogger is an invitation-only game. Every time a user registers an account, an invitation code can be obtained. Each user can only hold one valid user per device, and one user account can hold multiple sports running shoes. Jogger will review valid equipment and sports data from time to time to facilitate marketing activities and promotions. If you register multiple accounts for one hardware device and submit invalid sports data, it proves that you have violated the data prevention and control mechanism.

4.2 Inventory system

Jogger inventory has two separate spaces:

- 1 . For official NFT sneakers, one space for official inventory .
- 2 . A space for the user's NFT sneakers and a space for the user's inventory . is not shared across all realms . If the official inventory is sold out , it can only be purchased from the user inventory space . If the inventory limit is exceeded, the items will not be lost, but they will not be displayed in the inventory until the user sells the excess items or uses them.

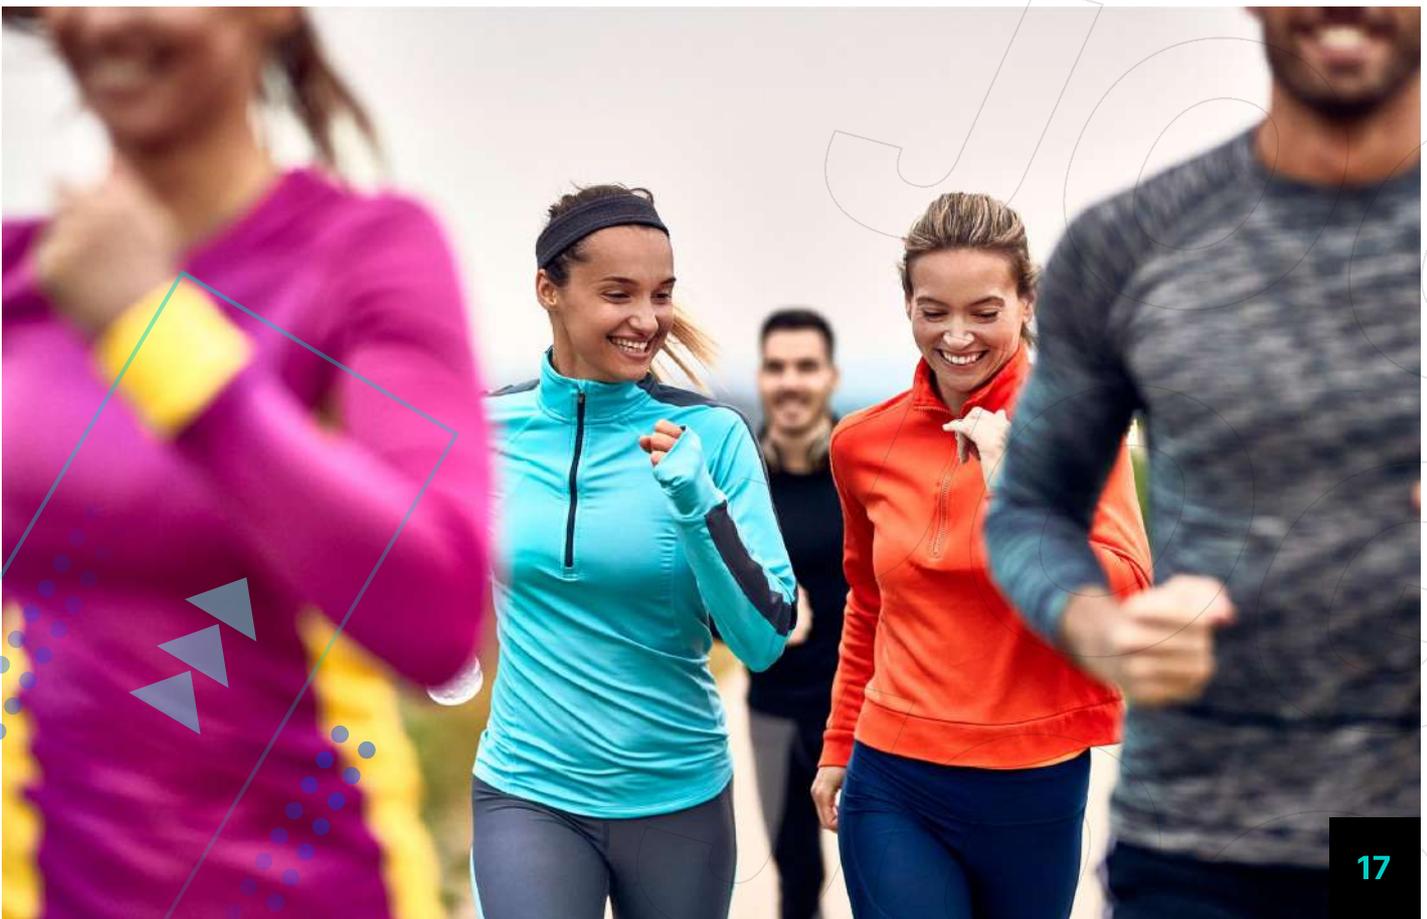

4.3 Notification system (Under Development)

The notification system shows the user's income and expenses, including:

1. Run /Marathon/Background Mode Revenue
2. Market Income - Leasing and Trade
3. Gifts and donations
4. Repair/Upgrade/Outlet Costs
5. Receive overspeed/underspeed penalties in single player mode

4.4 VIP system

Users can use Apple's In App Purchase function to subscribe to Jogger's monthly subscription VIP. This feature will also be available on Android soon.

FIELDS

5.1 What is a domain?

Realms are servers that host game forks - different users playing the same game in different Realms. Realm can be built on a new layer 1 blockchain or Jogger's existing layer 1 blockchain. Jogger works with its ecosystem partners to release new "realms" to attract more users and provide new value propositions.

Each domain will have a large degree of freedom to define its brand and community culture. Jogger 's ecosystem partners can define color themes, utility tokens, NFT visuals, and Realm narratives.

By creating new value propositions, Jogger Ecosystem Partners can enjoy :

1. Share royalties
 2. High level of interaction with community members of ecosystem partners
 3. Organic Growth Influenced by Core Community Values of Ecosystem Partners
- field ground rules

Users will find that different domains share a common set of laws:
Energy is shared across domains under certain conditions*

5.2 JOG across fields

The in-game utility Jogger does not bridge across realms.
*Energy is shared across domains through energy bridges:

When a new Realm is released, in addition to the Energy provided by Sneakers on the new Realm, users can share up to 1 Energy per old Realm with the new Realm.

1. Kortho chain field (kortho)
2. BNB Domain (BNB Chain)
3. ETH Field (Ethereum)

5.3 Market

The marketplace is where users can buy /sell/ synthesize their NFT sneakers. Simple filtering and sorting features are provided in Jogger for easy navigation.

5.4 Trading System

Users can buy and sell NFT sneakers on the marketplace.

1. For iOS, Jogger can be found on the official Jogger website, or visit www.Jogger.cc
2. Users can access Jogger directly within the app.

Note: Effective 28 February 2023 , all sneaker prices are in Singapore Standard Time. Users only need KTO/BNB/ETH as gas.

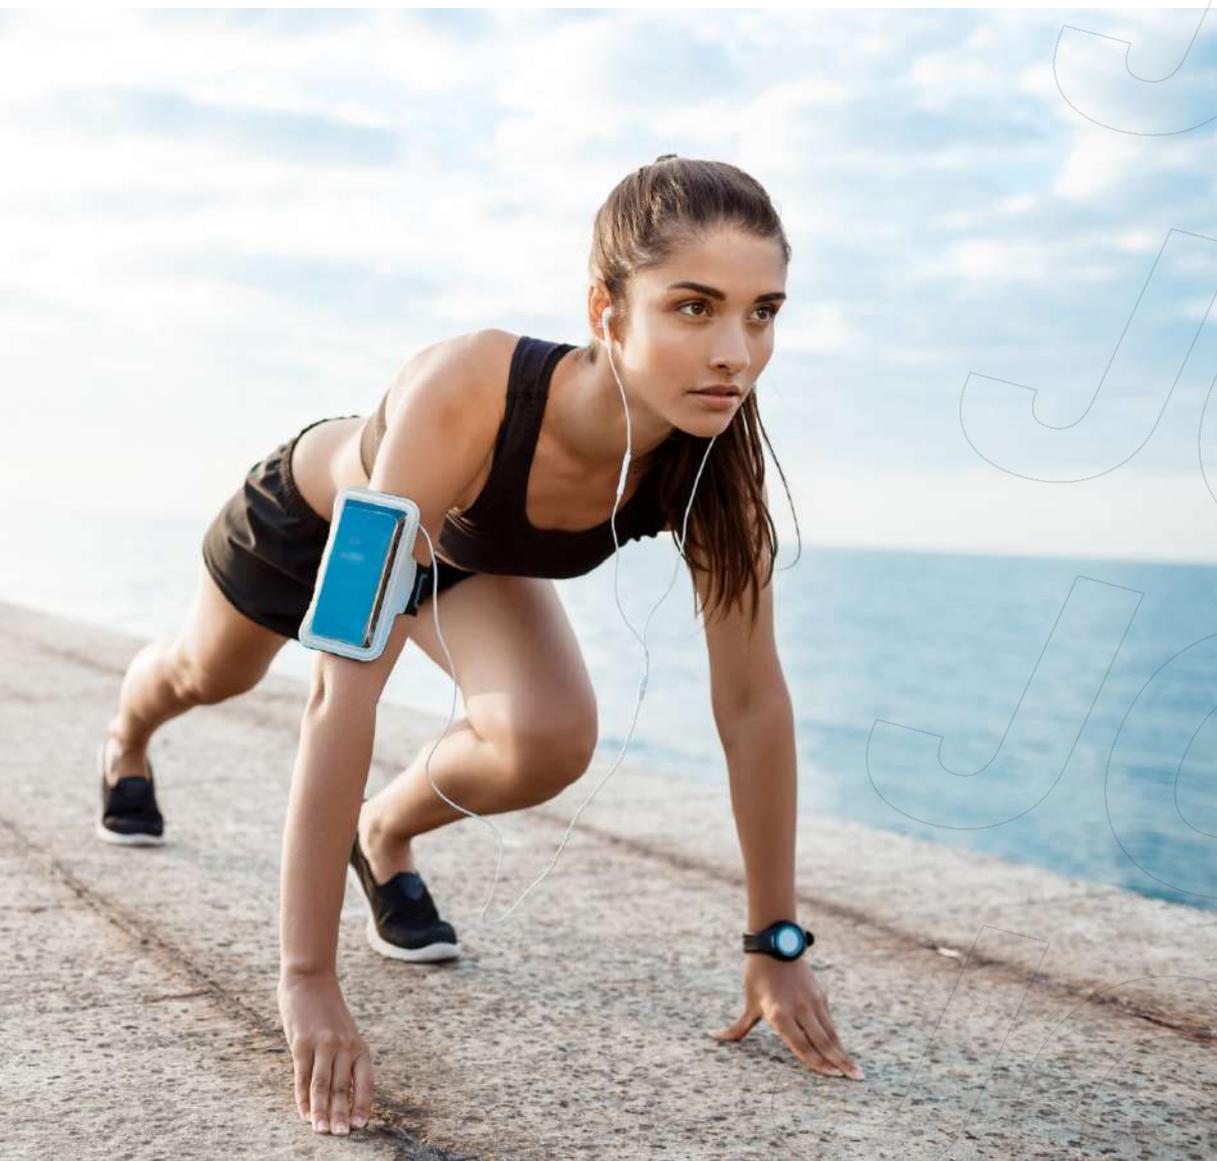

5.5 Rental System (Coming Soon)

The main hurdle we face when onboarding new users to crypto-related games is the complexity of the onboarding process. It starts with creating an Exchange account, converting fiat to cryptocurrency, and navigating Web 3.0 with a decentralized wallet. Jogger aims to break down this barrier with a mail sign-up system.

By providing a smart system, getting started is as easy as downloading a normal app, ensuring new users are not deterred from exploring the game.

New users who download the Jogger system can get a \$ 30 sneaker for free. You only need to complete the prescribed sports index to get JOG token incentives. Each trial sneaker can last for 30 days. If you want to continue to use the system, you need to use Jog tokens to buy a permanent version of the sneakers, and you can get JOG token incentives through continuous exercise .

TOKEN ECONOMICS

Definition

Game Token: JOG (Jogger Token)

Governance Token: KTO (Kortho Token)

About the JOG token distribution and vesting schedule :

JOG is the native token of the Jogger ecosystem with a fixed supply of 100 million pieces. JOG is well used in all Jogger ecosystem products for buying, selling, synthesizing, minting, burning, using and staking to unlock various functions and perks.

6.1 Consumption tax

Supply and Income

The supply of JOG is limited and available when the user is moving in sport mode.

Here are the contract and bridge addresses:

JOG (Kortho) contract address

0x8745ad71E180f96b7DA18B32Ac7F5195D542E3a8

JOG (BEP20) contract address:

JOG (ERC20) contract address:

Binance Bridge:

BNB chain:

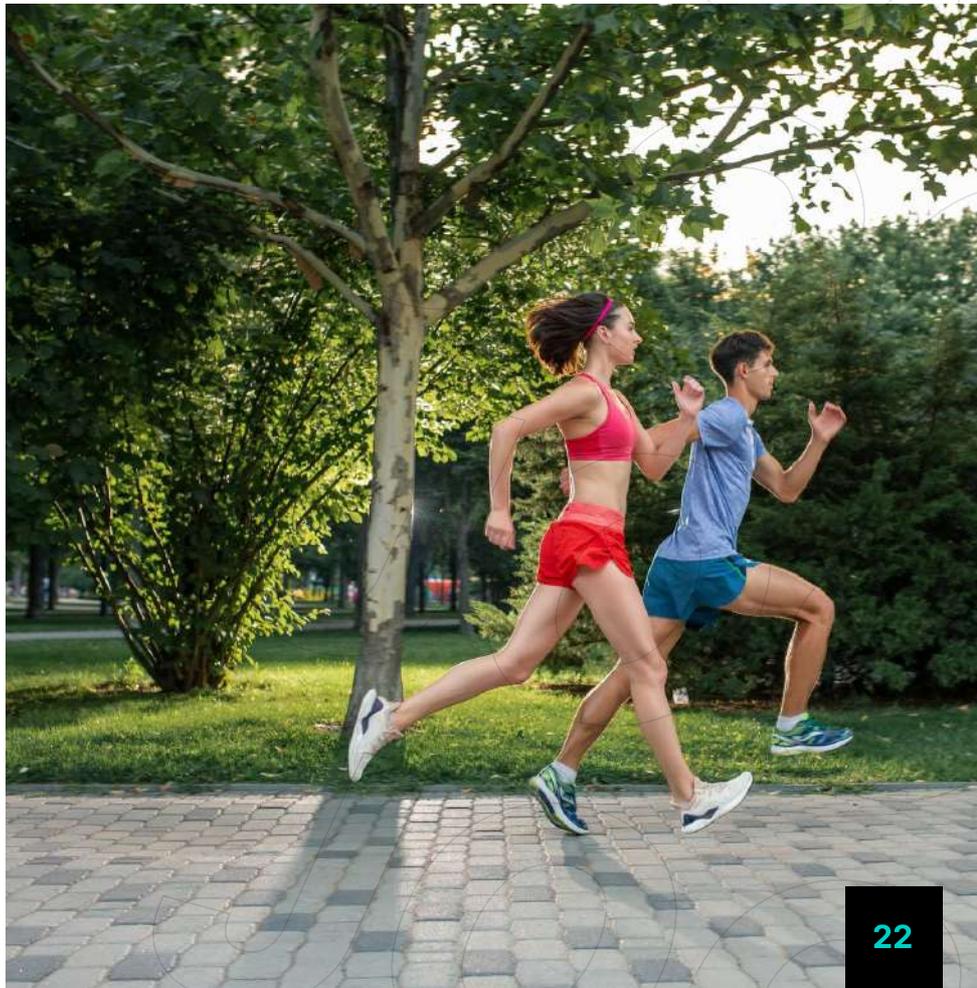

Kortho chain:

<https://ktobridge.web3s.finance/>

JOG burning mechanism (destruction)

JOG is destroyed by:

1. Sneakers
2. Official sale
3. Upgrade sneakers
4. Shop lease
5. Sales tax
6. Withdraw tax

6.2 Singapore Standard Time Earnings

JOG income start date

Stage	Prerequisites	Event	Status
Stage 1	Infrastructure Prerequisites	NFT / trading function opened	Complete
Stage 2	Practical Prerequisites	Brand co-branding is gradually implemented	To be finished
Stage 3	User Prerequisites	Establish an agent sales network	To be finished
Stage 4	Offline Prerequisites	Global User Offline Experience Center	To be finished

JOG income will be enabled on March 1, 2023.

JOG profit mechanism (General)

Here are the daily allocations:

Sports running: 50 %

Recruitment boost: 32 %

Online store agent: 10 %

Logistics and transportation: 8%

Grade requirements

JOG income is only available for sneakers that reach level 6.

Production reduction mechanism

JOG is unlocked every day to earn. The daily release amount of JOG is fixed to 0.02 % of the balance when JOG income is turned on.

Proportional mechanic

JOG per capital income is calculated proportionally. The more users earning JOG in proportion to the athletic value of a given sneaker tier, exceeding the maximum daily supply, the less JOG income will be available per person . Vice versa.

6.3 Singapore Standard Time Burn

JOG was minted on the token generation event (Kortho), and a total of 100,000,000 JOG was minted on February 22, 2023.

The contract address of JOG is as follows:

0x8745ad71E180f96b7DA18B32Ac7F5195D542E3a8

JOG Attribution Mechanism

1% of the total amount of JOG will be allocated to users through Twitter and Facebook;
2% will be allocated to the previous consensus community private placement;
2% will be allocated to the technical community ecology;
95% will be allocated to ecological users. To ensure the longevity of the Jogger project, the total issuance of JOG will be capped at 0.02 % per day.

For more information on JOG token distribution and vesting schedule, please visit <https://www.Jogger.cc>

JOG Combustion Mechanics (Destruction)

Non-homogeneous token

1. Burn JOG to level 1/2/3/4/5 _ _ _ _ _
2. Burn JOG to upgrade 4 sports NFTs above level 5

Enhanced in-app Mechanisms

Sports fuel KTO to permanently increase the movement value daily income cap.

6.4 Additional utilities for JOG

Online Store
Coming Soon

6.5 Governance and Ecosystem Fund

Destruction of GST

All JOG user spending in the app is destroyed daily from the spending account.

Team benefits

Platform fees and royalties are reserved for the team to maintain its operations, and no less than 5% of the team's profits will be sent to the ecosystem fund. Here are the team's profits on K ortho , which will be earned daily:

KTO fee: 0xAE72A1967b710A01763EE4F287919be77EC6249a

JOG Fee: 0xAE72A1967b710A01763EE4F287919be77EC6249a

Other taxes collected by Jogger will be remitted to the national treasury pool, and the JOG ecological Participants decide:

Source of profit	Profit Distribution	Result
Official sale of NFT	70% destruction , 30% ecological construction	Reward JOG
NFT sold by users	30% tax platform construction	Reward JOG
Synthetic casting	5 % tax NFT copyright owner	Reward JOG
Withdraw tax	3 5% -6% Community Builders	Reward JOG
Fuel KTO	5%-50% brand co-branders	Reward JOG

Voting rights

By locking the pledged JOG, users will get higher voting rights:

Lock-up period	Weight
1 month	1
3 months	4
6 months	8
1 year	16
2 years	32
3 years	64

Ecosystem Fund (Ministry of Finance)

Every month, 5% of the total tax will be unlocked, and these JOG will be used to support the construction of Jogger 's global ecosystem. Unused Jogs will be stored in the Jogger warehouse .

CENTRALIZED EXCHANGES

JOG To ensure that global users are more convenient to trade and buy and sell, and will be listed on global exchanges , it goes through the following stages:

Phase 1: Jogger app exchange with independent front end : NFT sneaker exchange only serves users within the Jogger app.

Phase 2: Any user can provide JOG circulation transactions off-site.

Phase 3: JOG is listed on the centralized exchange, providing trading and circulation of JOG / USDT.

Phase 4: The physical sports shoes are launched, providing JOG physical commodity circulation.

Privacy

Jogger has no intention of profiting from user data; Jogger strictly adheres to Google and Apple privacy requirements.

Safety - Smart Contract

Jogger 's smart contract is natively developed by the official technical team to protect the rights and interests of users.

Jogger integrates Google 2 Factor Authentication to protect users' transactions and change users' information. Please keep your 2FA code in a safe place. It may take a month to reset 2FA.

NOTE: Users should never disclose their CAPTCHA or 2FA codes to anyone, not even the Jogger team , as we don't need/use these codes. Only scammers would ask for these codes. In addition to allowing players to log in with passwords, users can log in using a one-time verification code system sent to their email address.
